

Replica lead and copper panels... new from RENOLIT and MCM. Great news for specifiers, bad news for thieves!

RENOLIT and MCM have combined two niche products to create a unique single skin roofing & cladding system that offers the stunning visual appearance of traditional lead and copper, yet is far lighter in overall weight.

This innovative development has already made its appearance on several prestigious and heritage developments throughout the UK during 2011, and is now available as off-the-shelf or made to measure packages.

- Utilises unique finishes from the RENOLIT ALKORPLAN single ply membrane portfolio
- More economical material and labour costs, compared to traditional lead or copper
- Fast and simple installation – greatly reduces risk of stripping through theft
- Full range of developed detailing and specialist inhouse design available
- Great flexibility – suits a wide range of decks and pitches including barrel vault construction
- ALKORPLAN membrane is fire retardent, recycleable and backed by full product warranty
